

10 Useful Apps to add to your NetAlly Android Tools

When you buy a NetAlly LinkRunner G2, LinkRunner 10G or EtherScope nXG there's an Android O/S powering everything, which means you can add Apps to your tools.

The NetAlly App store currently has over 270 Apps approved for use on their products and you can request new ones as you find them.

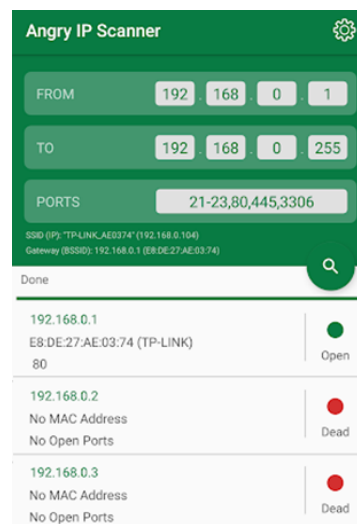

Here are a few of our favourites.

1. Angry Port Scanner

Angry Port Scanner
Author: Osama Eshmilh
Category: tools

- Wi-Fi/LAN scanner: discover all devices connected to any network
- Full device details including IP address, MAC address, Device Name, Vendor, Device Manufacturer
- Subnet scanner
- Full Port scanner: TCP port scanning that automatically finds open ports and available services on all scanned hosts
- Ping and traceroute: for network quality measurement

5. Keeper Password Manager

Keeper Password Manager
Author: Keeper Security, Inc.
Category: tools

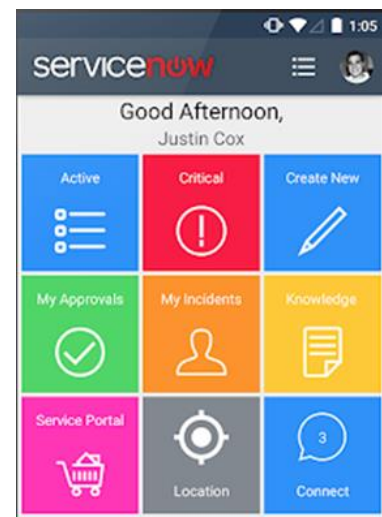

Keeper is the most secure password manager app for Android!

Keeper offers password storage for everyone - generate, store, and AutoFill passwords on all your devices with your encrypted vault. Sync passwords across all devices to manage your passwords with the Keeper App.

6. ServiceNow

ServiceNow Classic
Author: ServiceNow
Category: tools

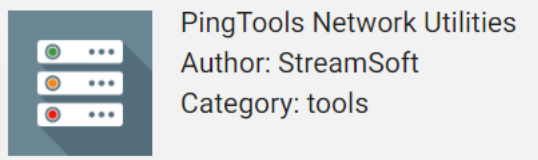

Change the way people work in the enterprise with the new ServiceNow app for Android. Stop relying on antiquated, disparate technologies and deliver a modern service experience to everyone in your organization.

ServiceNow for Android includes:

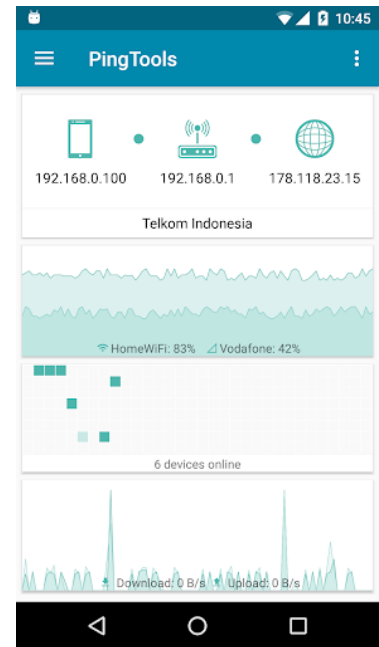

- Incident Management: Take action immediately and securely, with a mobile-first experience designed for you and your team.
- Connect & Presence: Stop killing productivity with email and collaborate directly with the people that matter, when it matters the most.
- Get The Full Picture: With activity streams and push notifications, get the context you need and know exactly what's going on the moment it happens.
- Workflows On-The-Go: Access your enterprise Service Catalog or make approvals on the way to your next meeting, directly from your Android device.
