

# Kiwi Syslog Server NG

## Centralize Log Management Across Network Devices and Servers

“ We’re currently using it to monitor our data center servers and network devices. It’s helping us a great deal in identifying all sorts of issues across our infrastructure and server hardware. The easy to read and view log viewer as well as the easy to set to setup logging capabilities are outstanding.

– Engineer in Information Technology,  
Government Administration Company

Kiwi Syslog Server NG is a new generation of the iconic Kiwi Syslog Server from SolarWinds®. Equipped with a completely new UI, and improved performance and security, Kiwi Syslog Server NG is an affordable syslog management tool for network and systems engineers. It receives syslog messages and SNMP traps from network devices (routers, switches, firewalls, etc.), and Linux®/Unix® hosts. You can filter and view these messages based on time, hostname, severity, etc., and set up custom alerts. Kiwi Syslog Server NG has built-in actions to react appropriately to syslog messages. There are also log archival and clean-up features designed to help you comply with security policies.

### KIWI SYSLOG SERVER NG AT A GLANCE

- Centralized monitoring of syslog messages, SNMP traps, and Windows® event logs
- Intuitive web-based application to filter and view logs
- React to messages: send email alerts, run programs, or forward data when messages arrive
- Store and archive logs to assist with regulatory compliance
- Reworked UI with an intuitive dashboard
- Improved performance and strengthened security

## FEATURES

### Powerful and Robust Syslog Server

Kiwi Syslog Server NG listens to syslog messages and SNMP traps from network devices and Linux/Unix hosts for comprehensive, network-wide log management. Kiwi Syslog Server NG is easy to install and use. Licensed by the number of syslog server installations, Kiwi Syslog Server NG is priced starting at \$359<sup>1</sup> per install.

- Supports an unlimited number of devices for Syslog collection
- Designed to handle up to two million messages per hour
- Supports log collection from both IPv4 and IPv6 devices

### Centralized Syslog Monitoring

Kiwi Syslog Server NG is an easy-to-use web-based application for viewing, searching, and filtering syslog messages. The web console provides up to 21 log display views you can customize according to your filter criteria. You can generate graphs of syslog statistics over specific time periods.

### Advanced Syslog Alerting

Kiwi Syslog Server's intelligent alert functionality notifies you when the predefined criteria of a syslog is met based on time, type of syslog message, syslog source, etc. Receive an instant notification when the application receives critical-priority messages requiring your attention.

### Built-in Actions to React to Syslog Messages

To automate syslog responses for fast, effective responses to network issues, Kiwi Syslog Server NG includes a host of built-in actions to react to syslog messages, including:

- Trigger email notifications and reports
- Run scripts or external programs
- Log to a file, Windows event log, or database
- Split written logs by device, IP, hostname, date, or other message/time variables
- Forward syslog messages, SNMP traps (v1, v2, v3) to another host

### Forward Windows Events to Kiwi Syslog Server NG

In addition to syslog messages and SNMP traps, Kiwi Syslog Server NG allows you to monitor Windows events. Using the free tool Log Forwarder for Windows, you can forward Windows event logs to Kiwi Syslog Server NG as syslog messages. When Kiwi Syslog Server NG receives the syslog messages, you can perform log management actions on the Windows events.

<sup>1</sup> The USD price as of October 18, 2023. SolarWinds reserves the right to change the price.

### Retain and Archive Logs

Kiwi Syslog Server NG helps you meet SOX, PCI-DSS, FISMA, and other regulations by allowing you to log syslog messages to disk, files, and ODBC-compliant databases and implement your log retention policy.

### Forward Syslog Messages and SNMP Traps

You can use Kiwi Syslog Server NG to forward syslog messages and SNMP traps to other syslog hosts in external network management systems and security information and event management (SIEM) systems.

### Safely Transport Logs Over Any Network

Using the optional, free Kiwi Secure Tunnel, you can receive, compress, and safely transport syslog messages from distributed network devices and servers to your instance of Kiwi Syslog Server NG.

## INTEGRATION WITH SOLARWINDS IT MANAGEMENT TOOLS

Kiwi Syslog Server NG can forward syslog messages and SNMP traps to:

- **Network Performance Monitor (NPM):** Let Kiwi Syslog Server NG act as the middle man in filtering out all the unwanted syslog messages from devices before they are being sent to the NPM's primary/additional poller. Benefit from longer syslog retention capabilities using Kiwi Syslog Server NG.
- **Security Event Manager (SEM):** Forward log messages to SEM for deeper security analysis, real-time event correlation, and threat detection and remediation.
- **Loggly:** Forward log messages to Loggly® for proactive monitoring and advanced analysis in the cloud.
- **Papertrail:** Forward log messages to Papertrail™ for storing and analyzing logs in the cloud.

## SYSTEM REQUIREMENTS

HARDWARE OR SOFTWARE	REQUIREMENT
Operating system	<ul style="list-style-type: none"><li>• Windows Server 2022</li><li>• Windows Server 2019</li><li>• Windows Server 2016</li><li>• Windows 11</li><li>• Windows 10</li></ul>
Operating system architecture	<ul style="list-style-type: none"><li>• 32-bit</li><li>• 64-bit</li></ul>
CPU	Minimum: 2-core processor Recommended: 4-core processor
RAM	Minimum: 4 GB Recommended: 8 GB
Hard drive space	2 GB
.NET framework	Microsoft .NET Framework 7.0
Browser	<ul style="list-style-type: none"><li>• Google Chrome</li><li>• Mozilla Firefox</li><li>• Microsoft Edge</li><li>• Opera</li></ul>

## ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of simple, powerful, and secure IT management software built to enable customers to accelerate their digital transformation. Our solutions provide organizations worldwide—regardless of type, size, or complexity—with a comprehensive and unified view of today’s modern, distributed, and hybrid network environments. We continuously engage with technology professionals—IT service and operations professionals, DevOps and SecOps professionals, and database administrators (DBAs)—to understand the challenges they face in maintaining high-performing and highly available IT infrastructures, applications, and environments. The insights we gain from them, in places like our [THWACK®](#) community, allow us to address customers’ needs now, and in the future. Our focus on the user and our commitment to excellence in end-to-end hybrid IT management have established SolarWinds as a worldwide leader in solutions for observability, IT service management, application performance, and database management. Learn more today at [www.solarwinds.com](http://www.solarwinds.com).
