

Empower IT Operations with AI-driven Network Observability and Defense

Plixer solutions enable organizations to experience unmatched network visibility and control, ensuring you always know what’s happening on the network and can easily, predict, plan, maintain and secure the network ecosystem.

Taking IT Operations for the Network to the next level becomes easier and more affordable with Plixer One.

With Plixer One, you receive:

- **Flexibility**—Making it easier to adopt capabilities for best-in-class NetOps/SecOps workflows
- **Simplicity**—A unified source of network data and insights to help simplify operations
- **Best Value**—You can save up to 65% vs. other solutions.

Select your right fit

Get automated network monitoring, continuous traffic observability, and advanced AI-powered analytics with controls that ensure NetOps and SecOps can see, understand and act fast. Experience the next level in ITOPs with unified data collection across all network components, advanced AI, network security control, and integrations that accelerate response and optimize existing investments.

SCRUTINIZER

Ingests NetFlow data and provides intelligent traffic monitoring for increased operational efficiency and peak network performance across the data center, SD-WAN and Cloud

SCRUTINIZER IS NOW PLIXER ONE

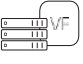

PLIXER ONE CORE

All the benefits of “Scrutinizer” plus advanced analytics and in-depth network observability that extend across unlimited exporter points for visibility everywhere in the global hybrid network

PLIXER ONE ENTERPRISE

“CORE” plus advanced AI, network security controls and more integrations, ensuring network performance, increase threat defense and unmatched workflow efficiency

Choose the right delivery for your organization

 <p>Virtual</p> <p>Flexible deployment options for virtual environments and the cloud.</p>	 <p>Hardware</p> <p>Achieve high performance with specialized and dedicated hardware</p>	 <p>Cloud Native</p> <p>Adaptable to cloud computing environments for successful digital transformation.</p>

Features and Capabilities

SCRUTINIZER

CORE

ENTERPRISE

Scrutinizer & Plixer One Capabilities

Scrutinizer is now Plixer One available in two versions, Core and Enterprise

Network Data Ingestion (NetFlow & SFlow Data types) Limited ingestion points	●	●	●
o Licensed for 10,000 or 100K FPS*	○		
o Scales to support over 1M FPS		●	●
Network Traffic Monitoring and Reporting	●	●	●
Cloud Data Ingestion	●	●	●
Intelligent Traffic Analysis	●	●	●
Selective PCAP Analysis*	○	●	●
Threat Intelligence Feeds	●	●	●
Fundamental Network Security Controls	●	●	●
Single-source Data Collection and Replication	●	●	●
100's of Out of the Box Reports	●	●	●

Get the most from Plixer

24x7 Support	○	●	●
Full Access Customer Success	○	●	●

Experience Greater Network Observability

High Availability*		○	●
Unlimited Data Ingestion Points		●	●
Multi-site deployment		●	●
Enhanced Data Analytics		●	●
Endpoint Profiling & Identity Mapping		●	●
User Behavior Analytics (RADIUS/AZURE/Entrada et/al)		●	●
Service Now and Tenable Integrations		●	●

Realize Unmatched Network Observability & Defense

Advanced AI Engine			●
Advanced Security Analytics			●
Traffic Forecasting			●
Predictive Capacity Planning			●
Data Streaming			●
MITRE ATT&CK Mapping			●
Microsoft Defender XDR Integration			●
Network/Application DDoS Defense			●
Protocol Anomaly detection			●
Layer 3 -7 threat detection			●
STIX/TAXII Import			●

*NOTES

- ① Scrutinizer is licensed separately for 10,000 FPS (SSRV) or for up to 100K FPS (SCR)
- ② High Availability deployment is included in Plixer One Enterprise and is also sold separately as an option in Plixer One Core. It is unavailable in Scrutinizer.
- ③ In Scrutinizer 'Selective PCAP', Support, and Customer Success are each sold as separate options.
